

Types of Capital: Pros and Cons

Depending on the stage a business is in, it will use different types of financing that each have their own unique set of "Pros" and "Cons".

FINANCING MECHANISM	DEFINITION	PROS	CONS
Seed Capital	<ul style="list-style-type: none"> Very early financing given to the entrepreneur that is meant to support the business until it can generate cash flow. 	<ul style="list-style-type: none"> The entrepreneur personally knows who they are borrowing from. 	<ul style="list-style-type: none"> May need to give up part of ownership/decision-making power in exchange for cash.
Personal Savings	<ul style="list-style-type: none"> Money that the entrepreneur has saved over time. 	<ul style="list-style-type: none"> Demonstrates commitment. Used at the discretion of the entrepreneur. 	<ul style="list-style-type: none"> Not always sufficient. Increases the risk of the entrepreneur.
Startup Loan	<ul style="list-style-type: none"> Financial support given to the entrepreneur at the beginning of her business with the expectation that the money will be paid back, and often with interest. 	<ul style="list-style-type: none"> Do not need to give up equity or decision making power in exchange for financial resources. 	<ul style="list-style-type: none"> Can be difficult to obtain through formal financial institutions during startup phase. Interest rates may be high.
Friends and Family Funding	<ul style="list-style-type: none"> Financial support given to the entrepreneur by family members or close friends. Can be as a loan, equity or a gift. 	<ul style="list-style-type: none"> Typically more supportive and understanding of the entrepreneur's vision. Requires less rigorous process than financial institutions for funding. 	<ul style="list-style-type: none"> Miscommunication is common - expectations are not commonly outlined before money is exchanged. Be sure to draft a contract that outlines the agreement!
Equity Crowd Funding	<ul style="list-style-type: none"> People, typically over the internet, invest in an unlisted company in exchange for shares or ownership in that company. 	<ul style="list-style-type: none"> Avoids complicated processes of formal financial institutions - typically a speedy process. Gives entrepreneur more exposure to a large number of potential investors. 	<ul style="list-style-type: none"> Gives up part ownership/decision-making power in exchange for funding. Commonly gain only financing, as opposed to expertise and network that is provided in traditional equity deals.

FINANCING MECHANISM	DEFINITION	PROS	CONS
Angel Investor	<ul style="list-style-type: none"> A person that provides capital to a startup or a small entrepreneur. Angel investors usually invest because they believe in the person behind the business. 	<ul style="list-style-type: none"> Funds are typically provided by someone aligned with the entrepreneur's vision. Minimal need for "proof of concept" or successful track record. Investment often based on belief in the entrepreneur. 	<ul style="list-style-type: none"> May cause the entrepreneur to give up equity at an early stage in their business. Investor may want to heavily influence the decisions or direction of the business.
Overdraft Loan	<ul style="list-style-type: none"> Allows an entrepreneur to continue drawing money from an account, even when the account has reached zero. This is typically a fixed amount allowed by the institution. 	<ul style="list-style-type: none"> A very convenient and hassle-free way to borrow money when needed. Handles timing mismatch of flow of funds. 	<ul style="list-style-type: none"> Interest rates can be very high. There is a very strict limit to the amount that can be overdrafted, and this can be reduced.
Peer-to-Peer Lending	<ul style="list-style-type: none"> The practice of lending money to unrelated individuals without using a traditional financial intermediary such as a bank. 	<ul style="list-style-type: none"> Avoids the bureaucracy of traditional financial institutions, making the borrowing process faster. Typically a lower cost of borrowing. 	<ul style="list-style-type: none"> Entrepreneur may not get the whole amount of the loan she is seeking. May not be good option for entrepreneurs who value their privacy.
Asset-based Lending	<ul style="list-style-type: none"> A loan to a business that is secured by collateral, or an asset of the entrepreneur. 	<ul style="list-style-type: none"> Typically lower interest rates (depending on the quality of the asset lent). 	<ul style="list-style-type: none"> Must have assets such as inventory, accounts receivables, and other balance sheet assets to secure a loan.
Leasing	<ul style="list-style-type: none"> An agreement where the entrepreneur agrees to rent property from another party for a fixed amount of time. The owner typically pays for the right to use this property on a monthly basis. 	<ul style="list-style-type: none"> Allows entrepreneur to pay small amount on a monthly basis to use someone else's property - no large initial capital outlay! Often avoids long-term cost of owning equipment, such as repairs or replacement. 	<ul style="list-style-type: none"> The property used can never be considered an asset to an entrepreneur's company, only a cost. Over the long run, this may be more expensive than owning the property.

FINANCING MECHANISM	DEFINITION	PROS	CONS
Trade Financing	<ul style="list-style-type: none"> Typically includes activities such as lending, issuing letters of credit, factoring and export credit and insurance. 	<ul style="list-style-type: none"> Encompasses various financing options so that the entrepreneur can determine which is best for her situation. 	<ul style="list-style-type: none"> Many options only provided through traditional financial institutions. Many of these options may take a lot of time to materialize due to bureaucracy.
Mezzanine	<ul style="list-style-type: none"> This is debt capital that gives the lender the right to convert to an ownership or equity interest if the loan is not paid back on time and in full. 	<ul style="list-style-type: none"> Often offers flexibility on terms (coupon structure, amortization, covenants, etc.) to business owner. 	<ul style="list-style-type: none"> Carries a lot of risk, since the debt can be converted into equity which is very expensive for the entrepreneur.
Private Equity (PE) Investor	<ul style="list-style-type: none"> A formal investment organization that finances larger, more mature companies through big investment. 	<ul style="list-style-type: none"> Brings a lot of capital and expertise into the business. 	<ul style="list-style-type: none"> Entrepreneur typically loses a lot of control of the business, and new management is brought in.
Initial Public Offering (IPO)	<ul style="list-style-type: none"> The first sale of stock by a private company to the public. Typically a long, expensive and rigorous legal and regulatory process. 	<ul style="list-style-type: none"> Brings in a lot of capital to the business. 	<ul style="list-style-type: none"> Business is subject to a new host of regulations and financial reporting. Stockholders are now the priority of the business, not the owner's will.
Venture Capitalist (VC)	<ul style="list-style-type: none"> A person who invests in high potential startups for the sole purpose of achieving a big future payoff. 	<ul style="list-style-type: none"> Typically brings in capital and expertise. 	<ul style="list-style-type: none"> Entrepreneur's will is second to reaching profitability and growth goals of VC, which are typically extremely high.
